Conditions.

- I. The minimum annual revenue guaranteed shall be payable to Government in twelve equal monthly instalments. The contractor shall pay into the District Treasury of Bangalore the whole amount of the duty inclusive of the local cess payable to Government at the rates fixed by Government on the arrack issued from the distillery in each month on or before the 15th of the following month. If the duty payable on the issues of arrack up to the end of any month be not sufficient to make up the amount of the monthly instalments of the minimum guaranteed revenue up to that month, the contractor shall pay such further sum as may be required to make up the deficiency. The excess sale of any month shall be available to make up any deficiency in any other month of the same official year. If the above payments are not made on or before the 15th of the month following that for which they are due, interest at the rate of 6 per cent per annum will be charged from that date on all the arrears outstanding; and should the default continue after the lapse of the month in which the payments are due, the arrears with the interest due shall be recovered by attachment and sale of the property of the contractor in the manner provided for by the rules for the time being in force for the recovery of arrears of land revenue. And it shall further be at the discretion of the Dewan upon the report of the Deputy Commissioner of Bangalore to declare the contract cancelled, to direct the forfeiture of the deposit made by the contractor, and to cause the business to be carried on by Government officers or otherwise, at the expense and risk of the contractor, during the unexpired period of his contract.
- II. The accounts for each year shall be closed separately. If the duty payable to Government on the arrack issued during the year exceed the minimum revenue guaranteed for the year, the contractor will be allowed a deduction from the duty payable by him equal to one anna on every rupee of the amount of such excess. But the excess of one year will not be available to make up any deficiency in the amount of the guaranteed revenue of any other year of the contract.
- III. The contractor will be required to manufacture within the enclosure of the Government Distillery near Bangalore, or at such other place as may be fixed by the Deputy Commissioner, and to establish wholesale depôts in such places as shall be appointed by the Deputy Commissioner. The distillery and depôts shall be open at all times for inspection by the Deputy Commissioner or any official appointed for that purpose. No arrack shall be taken out of the distillery until it has been measured and tested by an official appointed for that purpose. The contractor will further be required to pay monthly to Government a rent of Rs. 150 for the use of the distillery buildings and to keep the said buildings in a state of thorough repair. The contractor shall take over any arrack distilled by the previous contractors which may remain as stock on hand on the 1st April 1884, paying to them such compensation for the same as may be fixed by the Deputy Commissioner with the sanction of the Dewan.
- IV. The arrack manufactured shall be of good quality. The articles used in distilling shall be approved by the Deputy Commissioner and be of good quality, and shall be shown to, and passed by, the Distillery Supervisor or other official appointed for the purpose before being received into the distillery. No ingredients obnoxious to health shall be used in distilling or put into the arrack after it has been made, and all the ingredients used shall be in the established initial proportion or in such other proportion as may hereafter be fixed by Government so as to ensure a proper control by the officers of Government over the results of the distillation effected by the contractor daily.
- V. The contractor shall keep true and correct accounts in the prescribed forms of his receipts and disbursements, and of the quantity and strength of the spirits manufactured, received and issued in the distillery and in each depôt, and of all the materials received and expended

daily at the distillery. He shall produce such accounts whenever required to do so for inspection by the Deputy Commissioner, the Head Supervisor or any other official appointed for the purpose.

- VI. The distiller shall be bound always to have a month's supply and not less than 14,000 gallons of liquor in store, and in order that this may be the case from 1st April 1884, he will be allowed to commence distilling before that date, provided that no liquor so distilled shall be sold or passed out of his custody or that of his employes before the 1st April 1884. The contractor shall be allowed to have wholesale shops in all Taluk kasabas and large towns approved of by the Deputy Commissioner or Sub-Division Officer within whose jurisdiction they may be situated. A list of all such places will be furnished on application to the Deputy Commissioner or Sub-Division Officer, and the contractor shall pay the prescribed license fee of Rs. 2 per shop per month.
- VII. The contractor shall not sell arrack by retail either in the distillery or in the wholesale shops except as provided for in the rules laid down under Conditions X and XII.
- VIII. The retail shops will be under the management of the Deputy Commissioners of the Districts, and Officers in charge of Sub-Divisions of Districts, and in Municipal towns, where so ordered by the Dewan, under the Municipal President or Vice-President of such towns; and no new retail shops shall be opened except with their sanction and at such places appointed by them, and they are competent to order any shops to be closed on grounds of public expediency without any claim to compensation on the part of the contractor.
- IX. Licenses for the retail shops will be issued in the usual form by the above officers on payment of such rates of license fees as may, from time to time, be fixed by the Government.
- The licenses will provide for the sale of the arrack at the regulated prices and at the prescribed strength and for other necessary conditions. The retail vendors will be required to procure their liquor from such wholesale shops as may be nearest to them or from such others as they may elect once yearly to take it from. They will also be required to permit the contractor or his agent, the Excise officers, or any public servant duly authorized, free access to their shops in order to see that no irregularities take place, and to keep true and correct accounts of the quantity and strength of liquor received by them each day, and the prices charged for the same, and to produce the accounts for inspection whenever required so to do by the contractor or his agents, or any Government official authorized to call for them.
- X. The following rules regarding the issue of the arrack from the distillery shall be observed:—
- (a) No arrack shall ordinarily be issued at a strength above 20° under Proof, but should the contractor or retail vendor desire to issue at a higher strength than the above, the spirit so issued shall not be of a greater strength than Proof. Liquor of strength at Proof shall be issued from the distillery in two dozen quart bottles, four dozen pints and so on for lower denominations of flasks as for English and foreign spirits; and it shall be sold by wholesale to retail vendors in bottles intact as issued from the distillery with the seals affixed on them by the Head Supervisor and under cover of the Head Supervisor's passes. The retail vendors shall issue such liquor only to respectable persons known to them on separate passes granted by the Head Supervisor to the retail vendors, and both wholesale and retail dealers shall account for such sales separately in the forms prescribed.
- (b) Should the contractor wish to issue liquor of higher strength than Proof, he should obtain the special orders of the Deputy Commissioner therefor, through the Head Supervisor, who shall quote the same and issue passes accordingly to wholesale shops, and liquor so issued shall be sold and accounted for, as provided in Clause (a) of this para.
- (c) All liquor issued at a strength above 20° under Proof and up to Proof shall be charged the duty on Proof, the rate on above Proof being raised proportionately according to the hydrometer's scales.
- (d) No spirit below 20° under Proof shall be ordinarily issued from the distillery, but should there be a demand for liquor of lower strength than 20° under Proof, liquor at 30° under Proof may be specially issued from the distillery at proportionately reduced rates

of duty, such liquor being kept and accounted for separately both in the wholesale depôts and in the retail shops.

- XI. The arrack shall be sold as issued from the distillery and shall not be adulterated or diluted in any manner either in the wholesale or retail shops.
- XII. The Government duty including the local cess of one anna in the rupee payable on arrack of the strength of 20° under Proof as well as the prices at which the same shall be sold (unadulterated and undiluted) at the wholesale and retail shops are hereby fixed as specified in the following table:—

The deposits made by the applicants whose tenders are rejected will be returned to them on their application.

5. The applicants whose tenders are selected by the Deputy Commissioner for submission to the Dewan, will be required to deposit at once, in cash or in Government securities, a sum equal to 1/4th (or one month's instalment) of the minimum annual revenue guaranteed by them; failing which, the deposit made with the tenders will be forfeited.

Conditions.

- I. The minimum annual revenue guaranteed shall be payable to Government in twelve equal monthly instalments. The contractor shall pay into the District Treasury of Kadur the whole amount of the duty inclusive of the local cess payable to Government at the rates fixed by Government on the arrack issued from the distillery in each month on or before the 15th of the following month. If the duty payable on the issues of arrack up to the end of any month be not sufficient to make up the amount of the monthly instalments of the minimum guaranteed revenue up to that month, the contractor shall pay such further sum as may be required to make up the deficiency. The excess sale of any month shall be available to make up any deficiency in any other month of the same official year. If the above payments are not made on or before the 15th of the month following that for which they are due, interest at the rate of 6 per cent per annum will be charged from that date on all the arrears outstanding; and should the default continue after the lapse of the month in which the payments are due, the arrears with the interest due shall be recovered by attachment and sale of

- the property of the contractor in the manner provided for by the rules for the time being in force for the recovery of arrears of land revenue. And it shall further be at the discretion of the Dewan upon the report of the Deputy Commissioner of Kadur to declare the contract cancelled, to direct the forfeiture of the deposit made by the contractor, and to cause the business to be carried on by Government officers or otherwise, at the expense and risk of the contractor, during the unexpired period of his contract.
- II. The accounts for each year shall be closed separately. If the duty payable to Government on the arrack issued during the year exceed the minimum revenue guaranteed for the year, the contractor will be allowed a deduction from the duty payable by him equal to one anna on every rupee of the amount of such excess. But the excess of one year will not be available to make up any deficiency in the amount of the guaranteed revenue of any other year of the contract.
 - III. The contractor will be required to manufacture within the enclosure of the Government Distillery at Chikmagalur or at such other place as may be fixed by the Deputy Commissioner and to establish wholesale depôts in such places as shall be appointed by the Deputy Commissioner. The distillery and depôts shall be open at all times for inspection by the Deputy Commissioner or any official appointed for that purpose. No arrack shall be taken out of the distillery until it has been measured and tested by an official appointed for that purpose. The contractor will further be required to pay monthly to Government such annual rent for the use of the distillery buildings as may be fixed by the Deputy Commissioner, calculating at the rate of 6 per cent on the value of those buildings, and to keep the said buildings in a state of thorough repair. The contractor shall take over any arrack distilled by the previous contractors which may remain as stock on hand on the 1st April 1884, paying to them such compensation for the same as may be fixed by the Deputy Commissioner with the sanction of the Dewan.
 - IV. The arrack manufactured shall be of good quality. The articles used in distilling shall be approved by the Deputy Commissioner and be of good quality, and shall be shown to, and passed by, the Distillery Supervisor or other official appointed for the purpose before being received into the distillery. No ingredients obnoxious to health shall be used in distilling or put into the arrack after it has been made, and all the ingredients used shall be in the established initial proportion or in such other proportion as may hereafter be fixed by Government so as to ensure a proper control by the officers of Government over the results of the distillation effected by the contractor daily.
 - V. The contractor shall keep true and correct accounts in the prescribed forms of his receipts and disbursements, and of the quantity and strength of the spirits manufactured, received and issued in the distillery and in each depôt, and of all the materials received and expended daily at the distillery. He shall produce such accounts whenever required to do so for inspection by the Deputy Commissioner, the Supervisor or any other official appointed for the purpose.
 - VI. The distiller shall be bound always to have a month's supply of liquor in store, and in order that this may be the case from 1st April 1884, he will be allowed to commence distilling before that date, provided that no liquor so distilled shall be sold or passed out of his custody or that of his employees before the 1st April 1884. The contractor shall be allowed to have wholesale shops in all Taluk Kasabas and large towns approved of by the Deputy Commissioner. A list of all such places will be furnished on application to the Deputy Commissioner and the contractor shall pay the prescribed license fee of Rs. 2 per shop per month.
 - VII. The contractor shall not sell arrack by retail either in the distillery or in the wholesale shops except as provided for in the rules laid down under Conditions X and XII.
 - VIII. The retail shops will be under the management of the Deputy Commissioner and in Municipal towns, where so ordered by the Dewan, under the Municipal President or Vice-President of such towns; and no new retail shops shall be opened except with their sanction and at such places appointed by them, and they are competent to order any shops to be closed on grounds of public expediency without any claim to compensation on the part of the contractor.
 - IX. Licenses for the retail shops will be issued in the usual form by the above officers on payment of such rates of license fees as may, from time to time, be fixed by the Government.

The licenses will provide for the sale of the arrack at the regulated prices and at the prescribed strength and for other necessary conditions. The retail vendors will be required to procure their liquor from such wholesale shops as may be nearest to them or from such others as they may elect once yearly to take it from. They will also be required to permit the contractor or his agent, the Excise officers, or any public servant duly authorized, free access to their shops in order to see that no irregularities take place, and to keep true and correct accounts of the quantity and strength of liquor received by them each day, and the prices charged for the same, and to produce the accounts for inspection whenever required so to do by the contractor or his agents, or any Government official authorized to call for them.

X. The following rules regarding the issue of the arrack from the distillery shall be observed :—

- (a) No arrack shall ordinarily be issued at a strength above 20° under Proof, but should the contractor or retail vendor desire to issue at a higher strength than the above, the spirit so issued shall not be of a greater strength than Proof. Liquor of strength at Proof shall be issued from the distillery in two dozen quart bottles, four dozen pints and so on for lower denominations of flasks as for English and foreign spirits; and it shall be sold by wholesale to retail vendors in bottles intact as issued from the distillery with the seals affixed on them by the Supervisor and under cover of the Supervisor's passes. The retail vendors shall issue such liquor only to respectable persons known to them on separate passes granted by the Supervisor to the retail vendors and both wholesale and retail dealers shall account for such sales separately in the forms prescribed.
- (b) Should the contractor wish to issue liquor of higher strength than Proof, he should obtain the special orders of the Deputy Commissioner therefor, through the Supervisor, who shall quote the same and issue passes accordingly to wholesale shops, and liquor so issued shall be sold and accounted for, as provided in Clause (a) of this para.
- (c) All liquor issued at a strength above 20° under Proof and up to Proof shall be charged the duty on Proof, the rate on above Proof being raised proportionately according to the hydrometer's scales.
- (d) No spirit below 20° under Proof shall be ordinarily issued from the distillery, but should there be a demand for liquor of lower strength than 20° under Proof, liquor at 30° under Proof may be specially issued from the distillery at proportionately reduced rates of duty, such liquor being kept and accounted for separately both in the wholesale depôts and in the retail shops.

XI. The arrack shall be sold as issued from the distillery and shall not be adulterated or diluted in any manner either in the wholesale or retail shops.

XII. The Government duty including the local cess of one anna in the rupee payable on arrack of the strength of 20° under Proof, as well as the prices at which the same shall be sold (unadulterated and undiluted) at the wholesale and retail shops, are hereby fixed as specified in the following table :—

Higher strengths shall not be issued except in urgent cases and upon the special sanction of the Deputy Commissioner.

XIII. On account of wastage, a discount or deduction of 2 per cent shall be allowed on the duty payable on liquor issued from the distillery for sale beyond the Municipal limits of the Town of Chikmagalur.

The contractor will moreover use his best endeavours to secure on the part of all persons employed by him in the manufacture, carriage and sale of arrack, a strict adherence to the provisions of the engagements entered into by them, and of the law, and if it come to his knowledge that a breach of those provisions has been committed, he will bring the circumstance to the notice of the Deputy Commissioner in order that the penalties prescribed for the offence may be enforced, and further dismiss the offender from his service if required so to do by the Deputy Commissioner.

XV. The contractor shall conform to any additional rules that may be prescribed from time to time by the Government, not inconsistent with the terms of the contract, and he shall see that all his employes give full effect to the rules and orders passed by Government for the custody and regulation of the stock distilled and passed out, the cleanliness of all vessels used, the tinning of metal vessels, the watch, ward and sanitary condition of the enclosure, and other matters affecting either the Government or the contractor's interests, or both.

XVI. If any wilful breach of any of the above conditions is committed by the contractor, or with his connivance and privity by any of the men employed by him in the manufacture, carriage or sale of arrack, it shall be at the discretion of the Dewan to cancel the contract and declare the deposit forfeited and cause the business to be carried on as provided in Condition I.

XVII. The Government may allow the contractor, subject to such conditions as may be prescribed by Government in that behalf to manufacture and sell Colombo or other kinds of arrack or liquor, but no deductions shall be allowed therefor on the revenue realized from the ordinary country arrack adverted to in this Notification.

- II. The accounts for each year shall be closed separately. If the duty payable to Government on the arrack issued during the year exceed the minimum revenue guaranteed for the year, the contractor will be allowed a deduction from the duty payable by him equal to one anna on every rupee of the amount of such excess. But the excess of one year will not be available to make up any deficiency in the amount of the guaranteed revenue of any other year of the contract.
- III. The contractor will be required to manufacture within the enclosure of the Government Distillery near Shimoga, or at such other place as may be fixed by the Deputy Commissioner and to establish wholesale depôts in such places as shall be appointed by the Deputy Commissioner. The distillery and depôts shall be open at all times for inspection by the Deputy Commissioner or any official appointed for that purpose. No arrack shall be taken out of the distillery until it has been measured and tested by an official appointed for that purpose. The contractor will further be required to pay monthly to Government such annual rent for the use of the distillery buildings as may be fixed by the Deputy Commissioner, calculating at the rate of 6 per cent on the value of those buildings, and to keep the said buildings in a state of thorough repair. The contractor shall take over any arrack distilled by the previous contractors which may remain as stock on hand on the 1st April 1884, paying to them such compensation for the same as may be fixed by the Deputy Commissioner with the sanction of the Dewan.
- IV. The arrack manufactured shall be of good quality. The articles used in distilling shall be approved by the Deputy Commissioner and be of good quality, and shall be shown to, and passed by, the Distillery Supervisor or other official appointed for the purpose before being received into the distillery. No ingredients obnoxious to health shall be used in distilling or put into the arrack after it has been made, and all the ingredients used shall be in the established initial proportion or in such other proportion as may hereafter be fixed by Government so as to ensure a proper control by the officers of Government over the results of the distillation effected by the contractor daily.
- V. The contractor shall keep true and correct accounts in the prescribed forms of his receipts and disbursements, and of the quantity and strength of the spirits manufactured, received and issued in the distillery and in each depôt, and of all the materials received and expended daily at the distillery. He shall produce such accounts whenever required to do so for inspection by the Deputy Commissioner, the Supervisor or any other official appointed for the purpose.
- VI. The distiller shall be bound always to have a month's supply of liquor in store, and in order that this may be the case from 1st April 1884, he will be allowed to commence distilling before that date, provided that no liquor so distilled shall be sold or passed out of his custody or that of his employés before the 1st April 1884. The contractor shall be allowed to have wholesale shops in all Taluk Kasabas and large towns approved of by the Deputy Commissioner. A list of all such places will be furnished on application to the Deputy Commissioner and the contractor shall pay the prescribed license fee of Rs. 2 per shop per month.
- VII. The contractor shall not sell arrack by retail either in the distillery or in the wholesale shops except as provided for in the rules laid down under Conditions X and XII.
- VIII. The retail shops will be under the management of the Deputy Commissioner and in Municipal towns, where so ordered by the Dewan, under the Municipal President or Vice-President of such towns; and no new retail shops shall be opened except with their sanction and at such places appointed by them, and they are competent to order any shops to be closed on grounds of public expediency without any claim to compensation on the part of the contractor.
- IX. Licenses for the retail shops will be issued in the usual form by the above officers on payment of such rates of license fees as may, from time to time, be fixed by the Government.

The licenses will provide for the sale of the arrack at the regulated prices and at the prescribed strength and for other necessary conditions. The retail vendors will be required to procure their liquor from such wholesale shops as may be nearest to them, or from such others as they may elect once yearly to take it from. They will also be required to permit the contractor or his agent, the Excise officers, or any public servant duly authorized, free access to their shops in order to see that no irregularities take place, and to keep true and correct accounts of the quantity and strength of liquor received by them each day, and the prices charged for the same, and to produce the accounts for inspection whenever required so to do by the contractor or his agents, or any Government official authorized to call for them.

X. The following rules regarding the issue of the arrack from the distillery shall be observed:—

- (a) No arrack shall ordinarily be issued at a strength above 20° under Proof, but should the contractor or retail vendor desire to issue at a higher strength than the above, the spirit so issued shall not be of a greater strength than Proof. Liquor of strength at Proof shall be issued from the distillery in two dozen quart bottles, four dozen pints and so on for lower denominations of flasks as for English and foreign spirits; and it shall be sold by wholesale to retail vendors in bottles intact as issued from the distillery with the seals affixed on them by the Supervisor and under cover of the Supervisor's passes. The retail vendors shall issue such liquor only to respectable persons known to them on separate passes granted by the Supervisor to the retail vendors, and both wholesale and retail dealers shall account for such sales separately in the forms prescribed.
- (b) Should the contractor wish to issue liquor of higher strength than Proof, he should obtain the special orders of the Deputy Commissioner therefor, through the Supervisor, who shall quote the same and issue passes accordingly to wholesale shops, and liquor so issued shall be sold and accounted for, as provided in Clause (a) of this para.
- (c) All liquor issued at a strength above 20° under Proof and up to Proof shall be charged the duty on Proof, the rate on above Proof being raised proportionately according to the hydrometer's scales.
- (d) No spirit below 20° under Proof shall be ordinarily issued from the distillery, but should there be a demand for liquor of lower strength than 20° under Proof, liquor at 30° under Proof may be specially issued from the distillery at proportionately reduced rates of duty, such liquor being kept and accounted for separately both in the wholesale depôts and in the retail shops.

XI. The arrack shall be sold as issued from the distillery and shall not be adulterated or diluted in any manner either in the wholesale or retail shops.

XII. The Government duty including the local cess of one anna in the rupee payable on arrack of the strength of 20° under Proof, as well as the prices at which the same shall be sold (unadulterated and undiluted) at the wholesale and retail shops, are hereby fixed as specified in the following table:—

Town or District.					Spirits 20° under Proof.

The rest of the District					2	2	0	3	14	0	4	8	0	0	1	6

The prices for Proof and 30° under Proof and the duty chargeable thereon as well as for all strengths over and under those strengths, shall be regulated proportionately on the rates above specified for 20° under Proof in accordance with Casella's rules which accompany each case of Government hydrometers. Nothing in these rules shall preclude the Supervisor, upon written application made to him for that purpose, from granting to respectable private individuals, and to Hospitals, Museums and other public institutions, liquor of any strength above 20° under Proof and up to 30° over Proof in quantities of not less than one ordinary quart bottle and not exceeding 2 gallons at wholesale rates of price. Higher strengths shall not be issued except in urgent cases and upon the special sanction of the Deputy Commissioner.

- XIII. On account of wastage a discount or deduction of 2 per cent shall be allowed on the duty payable on liquor issued from the distillery for sale beyond the Municipal limits of the Town of Shimoga.
- XIV. The contractor shall cause every person whom he may employ to superintend the distillery or wholesale shops or depôts, to execute, previous to such employment, such engagements as are compatible with the above conditions, and such engagements shall be deposited with the Deputy Commissioner of the District within one month from the 1st April 1884. The contractor will moreover use his best endeavours to secure on the part of all persons employed by him in the manufacture, carriage and sale of arrack, a strict adherence to the provisions of the engagements entered into by them, and of the law, and if it come to his knowledge that a breach of those provisions has been committed, he will bring the circumstance to the notice of the Deputy Commissioner of the District in order that the penalties prescribed for the offence may be enforced, and further dismiss the offender from his service, if required so to do by the Deputy Commissioner.
- XV. The contractor shall conform to any additional rules that may be prescribed from time to time by the Government, not inconsistent with the terms of the contract, and he shall see that all his employes give full effect to the rules and orders passed by Government for the custody and regulation of the stock distilled and passed out, the cleanliness of all vessels used, the tinning of metal vessels, the watch, ward and sanitary condition of the enclosure, and other matters affecting either the Government or the contractor's interests, or both.
- XVI. If any wilful breach of any of the above conditions is committed by the contractor, or with his connivance and privity by any of the men employed by him in the manufacture, carriage or sale of arrack, it shall be at the discretion of the Dewan to cancel the contract and declare the deposit forfeited and cause the business to be carried on as provided in Condition I.
- XVII. The Government may allow the contractor, subject to such conditions as may be prescribed by Government in that behalf, to manufacture and sell Colombo or other kinds of arrack or liquor, but no deductions shall be allowed therefor on the revenue realized from the ordinary country arrack adverted to in this Notification.

4. Each tender must be accompanied by a deposit of Rs. 200 in cash or in Government securities and enclosed in a cover superscribed with the words "Tender for the exclusive privilege of the manufacture and wholesale vend of arrack," and must be sent to the Deputy Commissioner so as to reach him on or before Tuesday, the 26th February 1884, after which date no tender will be received. 5. Conditions.

- I. The minimum annual revenue guaranteed shall be payable to Government in twelve equal monthly instalments. The contractor shall pay into the District Treasury of Kadur the whole amount of the duty inclusive of the local cess payable to Government at the rates fixed by Government on the arrack issued from the distillery in each month on or before the 15th of the following month. If the duty payable on the issues of arrack up to the end of any month be not sufficient to make up the amount of the monthly instalments of the minimum guaranteed revenue up to that month, the contractor shall pay such further sum as may be required to make up the deficiency. The excess sale of any month shall be available to make up any deficiency in any other month of the same official year. If the above payments are not made on or before the 15th of the month following that for which they are due, interest at the rate of 6 per cent per annum will be charged from that date on all the arrears outstanding; and should the default continue after the lapse of the month in which the payments are due, the arrears with the interest due shall be recovered by attachment and sale of

72

the property of the contractor in the manner provided for by the rules for the time being in force for the recovery of arrears of land revenue. And it shall further be at the discretion of the Dewan upon the report of the Deputy Commissioner of Kadur to declare the contract cancelled, to direct the forfeiture of the deposit made by the contractor, and to cause the business to be carried on by Government officers or otherwise, at the expense and risk of the contractor, during the unexpired period of his contract.

- II. The accounts for each year shall be closed separately. If the duty payable to Government on the arrack issued during the year exceed the minimum revenue guaranteed for the year, the contractor will be allowed a deduction from the duty payable by him equal to one anna on every rupee of the amount of such excess. But the excess of one year will not be available to make up any deficiency in the amount of the guaranteed revenue of any other year of the contract.
- III. The contractor will be required to manufacture within the enclosure of the Government Distillery at Chikmagalur or at such other place as may be fixed by the Deputy Commissioner and to establish wholesale depôts in such places as shall be appointed by the Deputy Commissioner. The distillery and depôts shall be open at all times for inspection by the Deputy Commissioner or any official appointed for that purpose. No arrack shall be taken out of the distillery until it has been measured and tested by an official appointed for that purpose. The contractor will further be required to pay monthly to Government such annual rent for the use of the distillery buildings as may be fixed by the Deputy Commissioner, calculating at the rate of 6 per cent on the value of those buildings, and to keep the said buildings in a state of thorough repair. The contractor shall take over any arrack distilled by the previous contractors which may remain as stock on hand on the 1st April 1884, paying to them such compensation for the same as may be fixed by the Deputy Commissioner with the sanction of the Dewan.
- IV. The arrack manufactured shall be of good quality. The articles used in distilling shall be approved by the Deputy Commissioner and be of good quality, and shall be shown to, and passed by, the Distillery Supervisor or other official appointed for the purpose before being received into the distillery. No ingredients obnoxious to health shall be used in distilling or put into the arrack after it has been made, and all the ingredients used shall be in the established initial proportion or in such other proportion as may hereafter be fixed by Government so as to ensure a proper control by the officers of Government over the results of the distillation effected by the contractor daily.
- V. The contractor shall keep true and correct accounts in the prescribed forms of his receipts and disbursements, and of the quantity and strength of the spirits manufactured, received and issued in the distillery and in each depôt, and of all the materials received and expended daily at the distillery. He shall produce such accounts whenever required to do so for inspection by the Deputy Commissioner, the Supervisor or any other official appointed for the purpose.
- VI. The distiller shall be bound always to have a month's supply of liquor in store, and in order that this may be the case from 1st April 1884, he will be allowed to commence distilling before that date, provided that no liquor so distilled shall be sold or passed out of his custody or that of his employes before the 1st April 1884. The contractor shall be allowed to have wholesale shops in all Taluk Kasabas and large towns approved of by the Deputy Commissioner. A list of all such places will be furnished on application to the Deputy Commissioner and the contractor shall pay the prescribed license fee of Rs. 2 per shop per month.
- VII. The contractor shall not sell arrack by retail either in the distillery or in the wholesale shops except as provided for in the rules laid down under Conditions X and XII.
- VIII. The retail shops will be under the management of the Deputy Commissioner and in Municipal towns, where so ordered by the Dewan, under the Municipal President or Vice-President of such towns; and no new retail shops shall be opened except with their sanction and at such places appointed by them, and they are competent to order any shops to be closed on grounds of public expediency without any claim to compensation on the part of the contractor.
- IX. Licenses for the retail shops will be issued in the usual form by the above officers on payment of such rates of license fees as may, from time to time, be fixed by the Government.

The licenses will provide for the sale of the arrack at the regulated prices and at the prescribed strength and for other necessary conditions. The retail vendors will be required to procure their liquor from such wholesale shops as may be nearest to them or from such others as they may elect once yearly to take it from. They will also be required to permit the contractor or his agent, the Excise officers, or any public servant duly authorized, free access to their shops in order to see that no irregularities take place, and to keep true and correct accounts of the quantity and strength of liquor received by them each day, and the prices charged for the same, and to produce the accounts for inspection whenever required so to do by the contractor or his agents, or any Government official authorized to call for them.

X. The following rules regarding the issue of the arrack from the distillery shall be observed :—

- (a) No arrack shall ordinarily be issued at a strength above 20° under Proof, but should the contractor or retail vendor desire to issue at a higher strength than the above, the spirit so issued shall not be of a greater strength than Proof. Liquor of strength at Proof shall be issued from the distillery in two dozen quart bottles, four dozen pints and so on for lower denominations of flasks as for English and foreign spirits; and it shall be sold by wholesale to retail vendors in bottles intact as issued from the distillery with the seals affixed on them by the Supervisor and under cover of the Supervisor's passes. The retail vendors shall issue such liquor only to respectable persons known to them on separate passes granted by the Supervisor to the retail vendors, and both wholesale and retail dealers shall account for such sales separately in the forms prescribed.
- (b) Should the contractor wish to issue liquor of higher strength than Proof, he should obtain the special orders of the Deputy Commissioner therefor, through the Supervisor, who shall quote the same and issue passes accordingly to wholesale shops, and liquor so issued shall be sold and accounted for, as provided in Clause (a) of this para.
- (c) All liquor issued at a strength above 20° under Proof and up to Proof shall be charged the duty on Proof, the rate on above Proof being raised proportionately according to the hydrometer's scales.
- (d) No spirit below 20° under Proof shall be ordinarily issued from the distillery, but should there be a demand for liquor of lower strength than 20° under Proof, liquor at 30° under Proof may be specially issued from the distillery at proportionately reduced rates of duty, such liquor being kept and accounted for separately both in the wholesale depôts and in the retail shops.

XI. The arrack shall be sold as issued from the distillery and shall not be adulterated or diluted in any manner either in the wholesale or retail shops.

XII. The Government duty including the local cess of one anna in the rupee payable on arrack of the strength of 20° under Proof, as well as the prices at which the same shall be sold (unadulterated and undiluted) at the wholesale and retail shops, are hereby fixed as specified in the following table :—

Higher strengths shall not be issued except in urgent cases and upon the special sanction of the Deputy Commissioner.

- XIII. On account of wastage, a discount or deduction of 2 per cent shall be allowed on the duty payable on liquor issued from the distillery for sale beyond the Municipal limits of the Town of Chikmagalur.

- XV. The contractor shall conform to any additional rules that may be prescribed from time to time by the Government, not inconsistent with the terms of the contract, and he shall see that all his employes give full effect to the rules and orders passed by Government for the custody and regulation of the stock distilled and passed out, the cleanliness of all vessels used, the tinning of metal vessels, the watch, ward and sanitary condition of the enclosure, and other matters affecting either the Government or the contractor's interests, or both.
- XVI. If any wilful breach of any of the above conditions is committed by the contractor, or with his connivance and privity by any of the men employed by him in the manufacture, carriage or sale of arrack, it shall be at the discretion of the Dewan to cancel the contract and declare the deposit forfeited and cause the business to be carried on as provided in Condition I.
- XVII. The Government may allow the contractor, subject to such conditions as may be prescribed by Government in that behalf to manufacture and sell Colombo or other kinds of arrack or liquor, but no deductions shall be allowed therefor on the revenue realized from the ordinary country arrack adverted to in this Notification.

The tenders will be opened by the Deputy Commissioner in his Office at Chikmagalur at 1 p. m. on the 26th February 1884, in the presence of the applicants who may be present. The final disposal of the tenders will rest with the Dewan, who reserves to himself full power to reject any or all of the tenders without assigning any reason. The deposits made by the applicants whose tenders are rejected will be returned to them on their application.

5. The applicants whose tenders are selected by the Deputy Commissioner for submission to the Dewan, will be required to deposit at once, in cash or in Government securities, a sum equal to $\frac{1}{12}$ th (or one month's instalment) of the minimum annual revenue guaranteed by them; failing which, the deposit made with the tenders will be forfeited.

Conditions.

- I. The minimum annual revenue guaranteed shall be payable to Government in twelve equal monthly instalments. The contractor shall pay into the District Treasury of Kadur the whole amount of the duty inclusive of the local cess payable to Government at the rates fixed by Government on the arrack issued from the distillery in each month on or before the 15th of the following month. If the duty payable on the issues of arrack up to the end of any month be not sufficient to make up the amount of the monthly instalments of the minimum guaranteed revenue up to that month, the contractor shall pay such further sum as may be required to make up the deficiency. The excess sale of any month shall be available to make up any deficiency in any other month of the same official year. If the above payments are not made on or before the 15th of the month following that for which they are due, interest at the rate of 6 per cent per annum will be charged from that date on all the arrears outstanding; and should the default continue after the lapse of the month in which the payments are due, the arrears with the interest due shall be recovered by attachment and sale of the property of the contractor in the manner provided for by the rules for the time being in force for the recovery of arrears of land revenue. And it shall further be at the discretion of the Dewan upon the report of the Deputy Commissioner of Kadur to declare the contract cancelled, to direct the forfeiture of the deposit made by the contractor, and to cause the business to be carried on by Government officers or otherwise, at the expense and risk of the contractor, during the unexpired period of his contract.
- II. The accounts for each year shall be closed separately. If the duty payable to Government on the arrack issued during the year exceed the minimum revenue guaranteed for the year, the contractor will be allowed a deduction from the duty payable by him equal to one anna on every rupee of the amount of such excess. But the excess of one year will not be available to make up any deficiency in the amount of the guaranteed revenue of any other year of the contract.
- III. The contractor will be required to manufacture within the enclosure of the Government Distillery at Chikmagalur or at such other place as may be fixed by the Deputy Commissioner and to establish wholesale depôts in such places as shall be appointed by the Deputy Commissioner. The distillery and depôts shall be open at all times for inspection by the Deputy Commissioner or any official appointed for that purpose. No arrack shall be taken out of the distillery until it has been measured and tested by an official appointed for that purpose. The contractor will further be required to pay monthly to Government such annual rent for the use of the

distillery buildings as may be fixed by the Deputy Commissioner, calculating at the rate of 6 per cent on the value of those buildings, and to keep the said buildings in a state of thorough repair. The contractor shall take over any arrack distilled by the previous contractors which may remain as stock on hand on the 1st April 1884, paying to them such compensation for the same as may be fixed by the Deputy Commissioner with the sanction of the Dewan.

- IV. The arrack manufactured shall be of good quality. The articles used in distilling shall be approved by the Deputy Commissioner and be of good quality, and shall be shown to, and passed by, the Distillery Supervisor or other official appointed for the purpose before being received into the distillery. No ingredients obnoxious to health shall be used in distilling or put into the arrack after it has been made, and all the ingredients used shall be in the established initial proportion or in such other proportion as may hereafter be fixed by Government so as to ensure a proper control by the officers of Government over the results of the distillation effected by the contractor daily.
- V. The contractor shall keep true and correct accounts in the prescribed forms of his receipts and disbursements, and of the quantity and strength of the spirits manufactured, received and issued in the distillery and in each depôt, and of all the materials received and expended daily at the distillery. He shall produce such accounts whenever required to do so for inspection by the Deputy Commissioner, the Supervisor or any other official appointed for the purpose.
- VI. The distiller shall be bound always to have a month's supply of liquor in store, and in order that this may be the case from 1st April 1884, he will be allowed to commence distilling before that date, provided that no liquor so distilled shall be sold or passed out of his custody or that of his employes before the 1st April 1884. The contractor shall be allowed to have wholesale shops in all Taluk Kasabas and large towns approved of by the Deputy Commissioner. A list of all such places will be furnished on application to the Deputy Commissioner and the contractor shall pay the prescribed license fee of Rs. 2 per shop per month.
- VII. The contractor shall not sell arrack by retail either in the distillery or in the wholesale shops except as provided for in the rules laid down under Conditions X and XII.
- VIII. The retail shops will be under the management of the Deputy Commissioner and in Municipal towns, where so ordered by the Dewan, under the Municipal President or Vice-President of such towns; and no new retail shops shall be opened except with their sanction and at such places appointed by them, and they are competent to order any shops to be closed on grounds of public expediency without any claim to compensation on the part of the contractor.
- IX. Licenses for the retail shops will be issued in the usual form by the above officers on payment of such rates of license fees as may, from time to time, be fixed by the Government.

The licenses will provide for the sale of the arrack at the regulated prices and at the prescribed strength and for other necessary conditions. The retail vendors will be required to procure their liquor from such wholesale shops as may be nearest to them or from such others as they may elect once yearly to take it from. They will also be required to permit the contractor or his agent, the Excise officers, or any public servant duly authorized, free access to their shops in order to see that no irregularities take place; and to keep true and correct accounts of the quantity and strength of liquor received by them each day, and the prices charged for the same, and to produce the accounts for inspection whenever required so to do by the contractor or his agents, or any Government official authorized to call for them.

- X. The following rules regarding the issue of the arrack from the distillery shall be observed:—

- (a) No arrack shall ordinarily be issued at a strength above 20° under Proof, but should the contractor or retail vendor desire to issue at a higher strength than the above, the spirit so issued shall not be of a greater strength than Proof. Liquor of strength at Proof shall be issued from the distillery in two dozen quart bottles, four dozen pints and so on for lower denominations of flasks as for English and foreign spirits; and it shall be sold by wholesale to retail vendors in bottles intact as issued from the distillery with the seals affixed on them by the Supervisor and under cover of the Supervisor's passes. The retail vendors shall issue such liquor only to respectable persons known to them on separate passes granted by the Supervisor to the retail vendors, and both wholesale and retail dealers shall account for such sales separately in the forms prescribed.

- (b) Should the contractor wish to issue liquor of higher strength than Proof, he should obtain the special orders of the Deputy Commissioner therefor, through the Supervisor, who shall quote the same and issue passes accordingly to wholesale shops, and liquor so issued shall be sold and accounted for, as provided in Clause (a) of this para.
- (c) All liquor issued at a strength above 20° under Proof and up to Proof shall be charged the duty on Proof, the rate on above Proof being raised proportionately according to the hydrometer's scales.
- (d) No spirit below 20° under Proof shall be ordinarily issued from the distillery, but should there be a demand for liquor of lower strength than 20° under Proof, liquor at 30° under Proof may be specially issued from the distillery at proportionately reduced rates of duty, such liquor being kept and accounted for separately both in the wholesale depôts and in the retail shops.
- XI. The arrack shall be sold as issued from the distillery and shall not be adulterated or diluted in any manner either in the wholesale or retail shops.
- XII. The Government duty including the local cess of one anna in the rupee payable on arrack of the strength of 20° under Proof, as well as the prices at which the same shall be sold (unadulterated and undiluted) at the wholesale and retail shops, are hereby fixed as specified in the following table:—

Higher strengths shall not be issued except in urgent cases and upon the special sanction of the Deputy Commissioner.

3. The tenders must be delivered at the Office of the Deputy Commissioner, Mysore District, on or before noon of the 20th June 1884, when they will be opened by the Deputy Commissioner and the Officer in charge French Rocks Sub-Division in the presence of the applicants. The applicant whose tender may be selected for recommendation to Government will be required to deposit at once in cash or in Government securities, a further sum equal to one-twelfth (or one month's instalment) of the amount guaranteed to Government; failing which, the deposit made with the tender will be forfeited.

4. When the decision of the Government is announced, the deposits made by the applicants whose tenders have been rejected will be thereupon returned to them on their application. The Government reserves to itself the power of rejecting the highest or any tender without assigning any reason.

5. The party whose tender may be accepted shall, within 8 days after the decision of the Government has been communicated to him, deposit with the Deputy Commissioner or the Sub-Division Officer, as the case may be, a sum in cash or Government securities duly endorsed, which, with the sums previously deposited under para 3, shall be equal to one-fourth of the revenue guaranteed, and shall execute an agreement in the usual form on proper stamp, binding himself to conform to the conditions hereinafter set forth; and if he fails or refuses to sign the agreement, or to make the deposit required, the deposits already made will be forfeited to Government, and the lease otherwise disposed of.

6. Should the sales of ganja and its preparations by the contractor to the licensed vendors exceed the guaranteed amount, 25 per cent of such excess shall be duly paid over to Government with the last instalment payable for the period of the contract.

Conditions.

- I. The contract shall not be transferable, except with the approval of the Deputy Commissioner, or the Sub-Division Officer as the case may be.
- II. The Deputy Commissioner and the Sub-Division Officer shall be at liberty to make any alterations in the number and localities of the shops that they may from time to time consider necessary, or to close any shop without any claims for compensation on the part of the contractor in the manner and under the conditions set forth in para IX of this Notification.
- V. The confirmation of existing retail vendors, the nomination of new vendors, and the cancellation of licenses shall rest with the Deputy Commissioner, or the Sub-Division Officer as the case may be, under the rules in force. The Deputy Commissioner or the Sub-Division Officer as the case may be shall issue licenses in the prescribed form direct to the retail vendor as in the case of other drugs.
- VI. The contractor shall sell ganja and its preparations only to such licensed vendors, and shall not interfere with the retail vendors in any way.
- VII. The ganja sold shall be of good quality, and not be adulterated; and the contractor shall always keep on hand at least one month's supply of ganja.

But with the approval of the Deputy Commissioner, or the Sub-Division Officer as the case may be, the number so reduced might, if the public requirements demand it, be re-established in other suitable localities. It shall, however, be at the discretion of those officers to decline the re-opening of such shops if the number extant exceed the complement licensed in the year 1883—84, and the contractor shall have power only to claim the number so fixed being opened elsewhere and no more. On the other hand, should the exigencies of the State require the closing of shops to any number below the complement so fixed, the contractor shall, with the sanction of the Government, be granted proportionate compensation for the number so closed on the guaranteed amount paid for the number of shops so licensed in the year under advertence, if it be proved that the contractor has sustained loss by such reduction in the number of shops, but not otherwise.
- X. Whenever required, the contractor shall render a true and correct account of the sales at his wholesale depôt to the Deputy Commissioner, or Sub-Division Officer as the case may be, and allow the Officers of the Excise Department free access always and at all times to all the accounts kept by the contractor which shall all be true and accurate and in such forms as the Deputy Commissioner, or the Sub-Division Officer as the case may be, may approve of from time to time.

FINANCIAL DEPARTMENT.

GOVERNMENT OF INDIA PRO-NOTES—PAYMENT OF INTEREST AT MOFUSSIL TREASURIES.

Circular No. 1574, dated 31st January 1884.

The Comptroller has the honor to publish for the guidance of Treasury Officers and the holders of Government of India Promissory Notes the following Notification of the Government of India in Department of Finance and Commerce, No 378, dated 18th January 1884.

H. HUDSON,
Comptroller.

No. 378, dated Fort William, the 18th January 1884.

With reference to Notification issued from the Financial Department, dated 22nd May 1832, (published in the *Calcutta Gazette* of 26th idem), of which the following is the text,—

“Notice is hereby given that the Accountant General has been empowered to comply at his discretion with applications from the holders of Promissory Notes of the Supreme Government residing in the interior who may desire to receive the interest accruing upon their Notes from any Mofussil Treasury. When the interest of any Note may be so made payable at a Mofussil Treasury, an order to the effect will be written across the face of the Note, and parties desiring to alter the place of payment will be required to renew the Notes in the usual manner at the Office of the Accountant General at the Presidency.”

it is hereby notified that the payment at Mofussil Treasuries of interest upon Promissory Notes of the Government of India is made subject to the following conditions ; that is to say—

First.—That the person to whose, or to whose agent's, receipt payment is made, is either the person in whose name the Note was originally issued, or one who derives his title from the said person by a regular chain of endorsements of the form described in para 2 below.

Second.—That all the endorsements upon the Note, whether of transfer or of payment of interest, are clear and distinct, that there are no cross-endorsements, and that there remains room for a clear and distinct endorsement for renewal.

Third.—That the Note itself is not mutilated or torn. (Division into an upper and a lower half does not reckon as mutilation if the two halves are firmly rejoined.)

2. The form of endorsement referred to in the first condition must be one of the three following :—

(Signed) A. B.	Pay to C. D. (Signed) A. B.	Pay to C. D. or order. (Signed) A. B.
----------------	--------------------------------	--

in which A. B. the endorser is either a personal name, without addition of official capacity or of legal status (such as administrator, &c.), or is the name or usual signature of a well-known Bank ; A. B. being the holder according to the tenor of the note and endorsements, preceding that signed by himself.

3. If the person who presents the Note for payment of interest claims in any other way or under an endorsement of any other form than that above specified, or if the endorsements are not clear and distinct, or the Note mutilated or torn, the Treasury Officer is to refuse payment of interest and to require the claimant, if he desires such payment to be continued, to take the measures prescribed in the rules for obtaining a renewed Note in his own favor.

4. It should be noted that if A. B. is, according to the tenor of Note or endorsements, holder in any other than his personal capacity, an endorsement is not legally valid if it is made in his personal capacity only, whereas, if it is made in any other capacity, the Treasury Officer must, in conformity with the present orders, require renewal to be applied for. One effect of this order therefore is to cause reference to be made to the Public Debt Office in every case of endorsement by such a holder.

To—The Deputy Commissioners of Districts, Treasury Dept., Circular No. 1577, dated 4th March 1884.

With reference to standing orders the Comptroller has the honor to request that the Deputy Commissioners will be good enough to scrutinize their Revenue and Judicial deposit accounts and the detailed statements of local remittances under entries Nos. 4 and 5 and take immediate measures for clearing them off in the accounts for March.

(1.) Deposit items not exceeding one rupee unclaimed for 12 months ; (2) balances not exceeding one rupee partly repaid during the year ; (3) deposits of whatever amount unclaimed for more than three complete account years ending 31st March 1884, should be credited to Government.

Section 4.

Insert the following as a foot-note to this Section:—

In paragraph 4 of the Home Department Resolution No. 24—885-96, dated the 6th July 1883, the Government of India intimated to Local Governments and Administrations that the Secretary of State had approved of the principle to which attention was drawn in paragraph 7 of the Resolution* of the 7th September 1882, of imposing a check on the abuse of the Civil

Furlough Rules by recurring grants of furlough on medical certificate, and that the best mode of effecting that object was still under consideration.

*No. 33
1343-1354

2. The Secretary of State has now decided that the Civil Furlough Rules, as they stand, appear to make sufficient provision against their frequent or general abuse, and that any present formal modification of those rules is therefore unnecessary. Officers at home on medical leave will not be permitted to return to duty without a medical certificate of fitness for duty in India. At the same time His Lordship expresses his readiness to reconsider the subject should further experience show that more stringent precautions against abuse of the rules are necessary, and is of opinion that the matter might be brought by circular to the notice of Local Governments and Heads of Departments. It is pointed out that to grant leave on urgent private affairs in consideration of the state of an officer's health is not in accordance with the spirit of the rules. When an officer applies for repeated grants of medical leave within short intervals, the attention of the Medical Board should be drawn to his case with a view to their carefully considering the term of absence necessary for his complete recovery.

3. I am to request that in future these directions may be borne in mind. Section 4 of the Civil Leave Code gives the Local Government ample powers for regulating the grant of leave of every description.--[Circular in the Home Department, No. 22 (Public), dated 16th May 1884.]

REPORT ON INDIAN WHEAT BY McDOUGALL BROTHERS.

From T. W. Holderness, Esq., c. s., Offg. Secretary to the Government of India, To the Governments of Bengal, Punjab, N. W. Provinces and Oudh, The Chief Commissioner of the Central Provinces,—The Secretary for Berar to the Resident at Hyderabad,—Revenue and Agricultural Department—Agriculture—Circular No. 57A., dated Simla, the 10th August 1883.

I AM directed to forward the papers noted in the margin, regarding the cultivation of wheat, and to suggest that instructions similar to those recently issued by the Government of Bombay to its District officers might, with the permission of His Honor the Lt. Governor, be issued by the Government of—
you.

From Bengal Chamber of Commerce, dated 24th July 1883.
Resolution of the Bombay Government, No. 4754, dated 23rd June 1883.

2. The suggestion made by the Bengal Chamber of Commerce that prizes might be given for good cultivation seems also to merit consideration. The subject is one which might profitably engage the attention of district agricultural societies where they exist, and might be commended to their notice.

Copy, with copy of the enclosures, forwarded to the Foreign Department, with a request that the papers be communicated for information to the Political officers in any Native States in which wheat is grown for export.

T. W. HOLDERNESSE,
Offg. Secretary to the Govt. of India.

From H. W. I. Wood, Esq., Secretary, Bengal Chamber of Commerce, To the Secretary to the Government of India, Revenue and Agricultural Department, dated Calcutta, 24th July 1883.

I AM directed by the Committee of the Chamber of Commerce to submit, for the consideration of His Excellency the Viceroy and Governor General, the enclosed Resolution of the Government of Bombay on a representation by the Bombay Chamber relative to the expediency of steps being taken to urge upon growers of wheat the importance in their own interests of preventing admixture with the wheat of other grain or foreign substances and impurities which tends to lower prices being obtained than might otherwise be secured.

In placing this matter before His Excellency, the Committee direct me to express their hope that similar orders may be issued by the Government of India to Commissioners or other authorities of districts where wheat is cultivated for exportation.

It has also been suggested that the cultivation of wheat would be improved, and the admixture of inferior grains prevented, if Government were to offer, through local officers in the wheat-growing districts, small prizes for the best farmed fields in which no other grains were grown, and the Committee of the Chamber venture to recommend the suggestion to His Excellency's notice.

READ THE FOLLOWING :—

Extract from the Proceedings of the Government of Bombay, Revenue Department,—No. 4734, dated Bombay Castle, 23rd June 1883.

From the Secretary, Bombay Chamber of Commerce, To the Secretary to the Government of Bombay, Revenue Department, dated Bombay, 7th June 1883.

In the memorandum regarding the cultivation of wheat, &c., in the Bombay Presidency, including Sind, forwarded to the Chamber with your letter No. 7181, dated 14th October 1882, and in other papers issued by Government on the same subject, reference is made to the well-known fact that the relatively low price of Indian wheat in the London market is not so much due to its quality, which is generally very good, but to its admixture with dirt and other inferior grains, and that this admixture of inferior grains with the wheat is due to the fact that cultivators often grow other grains in the same field as wheat as a resource in the event of the failure of the wheat crop.

As the trade in Indian wheat is rising to great importance, and as it is most desirable that this practice should be discontinued, and the position of Indian wheat improved in the markets of Europe, the Committee of the Chamber of Commerce desire me to request that His Excellency the Governor in Council may be pleased, in the interest of the country, to order the local officers of Government in all districts where wheat is grown to take whatever steps may be possible to prevent this admixture being resorted to.

RESOLUTION.—Copies of the letter from the Chamber of Commerce should be forwarded to the Commissioner in Sind and the Commissioners of Divisions, who should be requested to communicate the remarks of the Chamber of Commerce to the Collectors of wheat-producing districts in their respective Divisions, and desire the Collectors to urge on wheat growers the importance in their own interests of preventing admixture with the wheat of dirt, other grain, or other foreign substance which leads to their obtaining for the wheat produced by them a lower price than they might otherwise secure.

2. Copies should also be forwarded to the Survey and Settlement Commissioner, and the Political officers in charge, Native States, where wheat is grown. A copy should be sent to Mr. E. C. Ozanne on his return to duty.

Government of India, Revenue and Agricultural Department, (Agriculture), To the Secretary to the Government of India, Foreign Department, Office Memorandum, No. 780A., Simla, the
25th August 1883.

The undersigned is directed to forward for communication, if thought necessary, to Native States 5 copies of a Report on Indian Wheat, received from Her Majesty's Secretary of State, together with a copy of the covering despatch.

T. HOLDERNESS,
Offg. Under-Secy. to the Govt. of India.

NOTES.

The Evaporation and Loss in milling.—The percentages under this heading, it will be noticed, vary considerably from—

No. 11, Russian Saxonska, stones	0.7
rollers	0.2 to
No. 13, Egyptian—Buhi, stones	5.5
rollers	5.4

These variations must not be attributed chiefly to the differences in qualities of the wheats, as they arise mainly from the waste and loss that is inseparable from working small quantities on a practical scale; about ten quarters of each wheat was operated upon in these experimental workings, whereas in ordinary milling a "grist" will run from one thousand to several thousand quarters. This will be readily understood, when it is borne in mind that, after the working of each separate wheat by either process, the stones or rollers, hoppers, elevators, dressing silks, &c., have to be swept out, and it is impossible to avoid some waste from this cause. In milling operations it is found there is a larger loss, &c., "unaccounted for" on inferior wheats than upon good wheats, but it does not exceed a total of 1 to 2 per cent. For practical purposes, the items Evaporation and Loss should be taken as obtained by competent millers, viz. :—

From stones	1 to 2 per cent.
From rollers	1 to 3 per cent.

according to the qualities of the wheats.

Water used in Bread making.—The difference in the quantities of water required by each of the flours from Indian wheats per 280 lbs. flour in making them into bread (ranging from 149.6 lbs. to 141.0 lbs. water) is partly accounted for by the fact of somewhat similar variations in the water absorbed in rendering the wheats mellow for milling.

Weight per bushel of Wheats.—These experimental workings have brought to light a fact well worth noting, viz., that the rule so generally held amongst wheat sellers and buyers, and thought to be without an exception, that the greater the weight of a bushel of wheat so much higher must it rank as a flour yielder, and consequently in value, must now be regarded as true only within a strict limit. A high standard of weight for any given cubical measurement is, no doubt, a good criterion as to dryness of condition and soundness of the grain, for any dampness in grain causes it to weigh *lighter* per bushel or quarter of measurement instead of heavier (a fact which will surprise the uninitiated). But experienced parties will study with interest the three columns in the synopsis of the wheats showing "weight of 100 separate grains" of each wheat, "weight per bushel," and "yield of flour." Taking equal weights of the four Indian wheats, it will be found that No. 3, weighing 60 lbs. per bushel, yielded more flour than No. 1, weighing 64 lbs.; also, that No. 4, weighing 60 lbs. per bushel, yielded more flour than No. 2, weighing 62½ lbs. The reason of this is evident. The four wheats were equally and perfectly dry, and probably would have weighed the same per bushel had the size and shape of the grains of each wheat been the same, but they differ widely in this respect, Nos. 1 and 2 being medium or small, and Nos. 3 and 4 long and arched. Hence the latter will not fill into a measure as closely as the former, leaving larger spaces unoccupied, and causing any given measure to weigh less in consequence. The old rule holds good for wheats the grains of which in size and shape are similar, but it will only mislead if applied to Indian wheats like Nos. 3 and 4. It was, doubtless, adopted at a period when it was the custom for all wheats to be sold by measure, and for sales by measure it is still a correct guide, but as sales are now made by weight rather than by measure, the rule can only safely be applied within the limits indicated.

After a careful examination of the wheats, of the flours and offals, of the bread obtained from the flours, and the records of the workings of each process, we have further to report :—

The four lots of Indian wheats were delivered to us, packed in the ordinary gunny bags, and all in good condition. None of them were sea damaged, nor had they suffered in any way from storage in the ship.

487

We examined the wheats and found them to be good representative sample of—

- No. I. Indian fine soft white,
- No. II. Indian superior soft red,
- No. III. Indian average hard white,
- No. IV. Indian average hard red,

but were, with the exception of No. 3, much cleaner and freer from impurities than these wheats generally are.

The leading characteristics of these wheats, details of which are in the tabulated statement, are as follows :—

The fine soft white (Lot 1).—Grains white, medium sized, and regular; fairly mellow; skin thin; handled exceedingly well; weight per bushel, 64 lbs.; which is only equalled by specially fine samples of any wheat. Clean and free from seeds; contained 2 per cent. of weevilled grains.

Results of the milling and bakings prove it is an exceedingly good and useful wheat; the flour being great in quantity, of pure white color and superior bloom, and with a slight beany flavour. It is more suitable for markets requiring *white* flours rather than strength, owing to its containing an exceptionally low percentage of gluten. The yield of bread from it is very large.

Superior soft red (Lot 2).—Grains dull light-brown, with about 5 per cent. white wheat. In size, half medium and half small; semi-hard; skin thin; handled very well; weight per bushel, 62½ lbs., which is only reached by fine wheats. Clean and free from seeds; contained only a trace of weevil.

Results of the milling and bakings prove it is good and useful wheat; the flour being great in quantity and of medium color and strength, with slight beany flavour, and containing an average of gluten. Suitable for markets requiring flours of medium strength and color. The yield of bread is exceptionally large.

Average hard white (Lot 3).—Grains light yellow and semi-transparent, with a little hard red; skin thin; in shape long and arched. The wheat itself was clean, but intermixed there was about 3 per cent hard dry bits of mud (which spoiled the handling), otherwise free from admixture. Weight, 60 lbs. bushel. Weevils only a trace.

Results of the milling and bakings prove it is a useful wheat for markets requiring strength; flavour, beany; the gluten (by water test) averaging 12 per cent. This wheat (and No. 4) are probably unsurpassed by any other wheats in the world as regards the quantity of flour yielded. In color, medium. Specially useful for mixing with very damp English wheats to bring them into condition for milling. It is also a profitable wheat for millers, owing to its requiring 8·4 per cent water to render it sufficiently mellow for use.

To this wheat, and to the Indian average hard red (Lot 4), must be awarded the distinction of *producing more bread than any other flour*, making it a "baker's flour as well as a "miller's". The yield of bread is exceptionally large.

Average hard red (Lot 4).—Grains very large and coarse, long, arched and pointed; in color dull brown, and semi-transparent, with an admixture of 10 per cent fine soft white; skin thin; handles well; contains a little gram, seed, linseed, and barley. Weight, 61½ lbs. per bushel. Weevils only a trace.

Results of the milling and bakings prove it produces a common and dry strong flour, in almost unequalled quantity. In color, inferior. A profitable wheat for millers, as it takes 7·6 per cent water to render it sufficiently mellow for use. The yield of bread is exceptionally large, making it a "baker's" flour as well as a "miller's." (See remarks on Lot 3.)

For characteristics and particulars of the other wheats and flours obtained from them, we beg to refer back to the tabulated statements, and need here only further remark respecting them.

No. 5, English.—The yield was poor, undoubtedly owing to these wheats this season being in poor condition, and color of flour not equal to that from this wheat when in prime condition.

No. 6, Australian, and No. 7, New Zealand.—High yields. Color and bloom of flours superior, and other characteristics very similar, except that Australian is decidedly stronger.

No. 8, *Californian*.—These wheats would be improved if the small quantity of barley and oats they so frequently contain could be kept out, which cannot be entirely removed by any separating machines, as they slightly depreciate the flour. Whilst below Australian and New Zealand in yield and strength (the former arising from its somewhat thicker skin), perhaps in the special points of color and bloom this flour, and that from American red winters (No. 9), are unequalled.

No. 9, *American red winter*.—The same remarks as on Lot 8 as to yield and quality of the flour.

No. 10, *American spring*.—Medium yield, arising from thickness of the skin, and the cockle and the buckwheat present. The flour is of good color and superior strength.

No. 11, *Russian, Saxonska*.—Medium yield of flour, good in color, and in strength quite unequalled. An invaluable wheat for mixing with weaker ones to add strength to the flour. Of gluten it contains (by the water test) 22.1 per cent (dry), or double of that contained in the English lot.

No. 12, *Russian, Taganrog*.—Good yield, color of flour good, with much yellow bloom, and for strength ranks next to Saxonska (No. 11).

No. 13, *Egyptian Buhi*.—Ranks only one degree above Saida (Lot 14.)

No. 14, *Egyptian, Saida*.—Deservedly ranks as the poorest wheat in the market; possesses no good qualities, and is not nearly worth its price.

The two Systems of Milling.

That of *grinding under millstones* has been in operation from time immemorial, and with but slight improvements, those of recent years relating chiefly to the dress or separation of the offals from the flour by the employment of cylinders lined with silk, instead of wire, within the dressing machines. This system produces flour of one "run" or quality, and does not offer facilities for the production of flours of high, medium, and low grades from the same wheat. Unless care is taken in the grinding to keep the stones sufficiently high, the flour is apt to be "dead" or "killed," that is, to lack anything approaching to granular character, owing to the stones having been employed too close together. On the other hand, if the stones are worked too "high," a loss results from all of the flour not being removed from the bran. It is inseparable from this grinding system that some of the outer skin or bran is also torn or ground into flour, so preventing the attainment of perfection of color. It is well adapted, however, for the production of common ordinary flours, for, as will be readily seen, it must produce a *greater quantity* of flour than a system which more thoroughly separates the offals.

By the *roller system* flour is produced by flattening or squeezing the grain through a series of rollers, as distinguished from the tearing or grinding of millstones. The wheat is first cracked through a first set of rolls and its sieve, so separating a small quantity of flour and dirt, the latter being liberated out of the crease of the wheat, and is not removable by any system of brushing or blowing. It is important to get rid of this impurity at the initial step of the process, as it then does not get incorporated with the subsequent flours. The cracked and purified wheat is then passed on through other sets of rolls and sieves, and rendered into middlings and flour. From these middlings the higher grades of flour are made; they are first freed from all light particles of the skin by being passed through "purifiers," and then through several successive sets of rolls and silks, each set yielding flour of a different grade. Each grade may be kept separate, or caused to run together into a mixing worm and so become one run of flour. (The wheats operated upon by this system in these experimental workings were so rendered into flour of one run or quality.) A leading feature in this system is that the germ of the wheat, in which lies the chief portion of the coloring matter of the grain, is not torn or ground into flour as it is by the system of grinding under stones, but the action of the rollers is to squeeze or flatten it, and, from its soft and oleaginous nature, to increase its size, so rendering its separation from the flour easy. The outer skin or bran is also freed from its adhering flour by the same pressure. But, inasmuch as hardly any of the bran is crushed into flour, the yield of offals must be larger than from the grinding system. The advantages of the system are, less liability to "kill" or destroy the granular nature of the flour, the removal of the dirt found in the creases of the wheat, and the separation of the germ, so rendering the attainment possible of a high standard in the character, color, and bloom of the flour. It is attended with a slightly increased yield of offals, which of course means the quantity of wheat required to produce a sack of flour must be proportionately increased; as a rough average, say 400 lbs. wheat for rollers against 380 lbs. for stones. Offals of very similar quality are produced by both systems *viz.*, coarse middlings, pollard, and bran, except that the bran from the rollers is smaller than from stones, and is consequently slightly lowered in value, say about 10s. per ton. The percentages of offals yielded by each system are given in the tabulated returns.

In these experimental workings the meshes of the silks through which the flours were dressed were as follows :—

In the grinding process	Silks No. 12.
„ roller	„	..	„ „ 13 (or one shade finer).

The Offals.—This is a subject of minor importance as compared with the yields and qualities of flour and bread, and it is only needful to state that, of the offals included in these returns, the middlings from both systems of milling were worked down to the quality known on the Mark Lane market as “coarse mids, fair average,” the bran to “bran from stones” and “bran from rollers,” and the pollard to “pollard, fair average.”

Gluten in bread.—From an economical standpoint it may be said the nutrition of bread mainly depends upon the gluten, or, in other words, the nitrogenous or albuminous compounds or flesh formers, contained in the flour from which it is produced. The starch would be equally important if it could not be obtained from other sources in as suitable a form at a much cheaper rate—as in rice, Indian corn, and potatoes. But its gluten is not obtainable from other sources, of equal quality and flavour. Hence its special value as a constituent of wheat. Further, upon the gluten in flour depends the elasticity of the texture of the bread, and consequent freedom from density or heaviness. It is generally believed that upon the percentage of gluten in flour depends the *yield* of bread that may be obtained from it; as illustrated by the Hungarian flours, which are almost unequalled for yield of bread, and rank high in gluten, but this is erroneous, as proved by the experimental workings now under review. It will be found that the flours high in gluten do not produce the most bread, unless, at the same time, they possess a high degree of *dryness*, for it is upon the *dryness* of a flour that the yield of bread mainly depends, and not upon the gluten. The two lots of flour from Russian wheats (Nos. 11 and 12) are those which are highest in gluten, yet they do not yield as much bread as any of the four Indian wheats (Nos. 1 to 4), and the difference in yield from the latter would have been still further increased had they not been previously mellowed with water, as noted, before milling; confirming it is the dryness of a flour that determines the yield of bread.

Another erroneous idea is, that upon the quantity of gluten present depends the height or loftiness of the bread. This would be correct, provided the fermentation of the dough were in all cases carried to a precise degree; but it varies widely, and it will be found the loftiness or height of the bread depends chiefly upon a high degree of fermentation, provided it be not carried to great excess, rather than upon the gluten. This is illustrated by the bread consumed in the London district, which is made from flours rich in gluten, yet is not so high or lofty as the bread consumed in some other districts, which is produced from flours containing much less gluten, the popular taste in London demanding strength, nutrition, and then fair color, whereas, in the districts referred to, a high degree of whiteness is demanded before nutrition.

The four Indian Wheats.

In addition to the particulars contained in the foregoing returns, we have to report that to any one experienced in the requirements of the wheat and flour markets of the United Kingdom and, indeed, of most other countries, it will be evident there is no probability of these Indian wheats coming into demand for manufacture into flour *without a liberal admixture* of other wheats. They all possess in a marked degree the same characteristics of great dryness, and a distinct beany and almost aromatic flavour, inseparable from wheats grown in the climates and soils of the tropics. Also the flours are ricey, the texture of the breads is too close, and the crust is hard and brittle. But these characteristics do not detract from their usefulness in any important degree. As is well known a miller cannot show skill in his craft to greater advantage or profit than that with which he selects his wheats, and mixes his grists, so as to produce to best advantage a flour from which bread can be made of the color, bloom, strength, and flavour desired, and with all a good yield.

We pronounce them to be exceedingly useful wheats, in fact hardly equalled for what is deficient and wanting in the English markets by any other wheats. Their chief characteristics are just those in which the wheats grown in our variable climate are most deficient. Their great dryness and soundness renders them invaluable for admixture with English wheats that are in any degree out of condition through moisture, and the great proportions of the wheats harvested here have been in that condition for some years past, a condition that must prevail in all other than that of wheats harvested and stored during fine and favorable weather; and this the English farmer knows, greatly to his cost, is a state of climate that is by a long way the exception rather than the rule. Added to their dryness, the thinness

of the skins of these wheats and consequent greatness of the yield of flour, must always place them in the front rank as a "miller's" wheat, whenever they are handled with reasonable intelligence and skill.

Such unprecedented yields of flour, as shown by these wheats, ranging (by ordinary grinding) from 77.46 to 80.52 per cent against English 65.2 and American spring 72.2, speaks volumes in their favour, and their value is still further increased by another point of merit of almost equal importance, *viz.*, a larger percentage of bread may be obtained than from any other of the flours included in this review.

That, for the best of these Indian wheats (the fine soft white), on the day they were valued on Mark Lane market, a price was offered as high as that for American winters, New Zealand or English (see list of values in synopsis), proves that the great value of the Indian wheats is becoming recognized here, a knowledge that will ere long extend to all our markets. The other lots of Indian (Nos. 2, 3, and 4) were lower in value to the extent of 4s. to 5s. per quarter, as might almost have been expected from the difference in color and other characteristics; still, as these latter wheats become better known here, this difference in price will be somewhat lessened. Their beany flavour is not a serious obstacle, as fair average deliveries, when well cleaned and properly dealt with, can be employed in the proportion of 25 per cent to 50 per cent along with home-grown or other wheats, such as Americans, possessing a fine sweet, milky, or nutty flavour.

Glancing at all the facts here elaborated, it is evident that these wheats afford a larger margin of profit both to the miller and baker than any other.

We venture to record a conviction we have long held, strongly emphasized by the results of these experimental workings, of the measureless importance of the great resources of the Indian empire being developed to the utmost in producing wheat for this country. Farmers here are finding that to live they must produce beef and mutton rather than grain, hence the greater need of resources of supply under our own control.

It is evident such a conviction is common to the members of your Honourable Council, as testified by their unceasing efforts in this direction. And we desire heartily to congratulate them upon the important fruits arising from their labours. The character and general excellence of the Indian wheats are improving with the deliveries of each successive season. The Indian wheats now specially under review were delivered to us in excellent condition (see details) with freedom from dirt (except Lot No. 3), barley, gram, and other impurities, also with a freedom from weevil, rarely equalled by Indian wheats, except the prime parcels of the past season, and there is no doubt an outlet in this country and the European continent for unlimited quantities at prices that shall prove remunerative to all parties concerned, either in their growth, transportation, or conversion into flour and bread.

*General information for Municipal Committees and their Servants, in reference
to Dangerous and Infectious Disease.*

1. One person with an infectious disease may occasion an epidemic.
2. A person coming from a source of cholera, and although suffering only from diarrhoea, may import the disease.
3. Railway trains, in a very short time, can carry infection to a great distance.
4. All assemblages of men, in which dangerous disease appears, are favorable to its rapid extension, and its bad sanitary condition, to the violence of the epidemic.
5. Regiments on the march, fairs, pilgrims form great epidemic sources, and carry the disease into the villages they travel through.
6. The opportune dispersion of assemblages of people lessens the violence of an epidemic; but it causes great danger of propagation.
7. Conditions which favor the intensity of epidemics are indigence, the crowding of individuals, their unhealthy condition, the hot season, deficiency of ventilation, and exhalations from a soil impregnated with organic matter, insufficient or impure water supply, exhalations from latrines and drains.
8. Ground once impregnated with choleraic matters retains for a considerable time the poison, and re-produces it when it has been extinct.
9. The air is a vehicle for carrying infection, but the transmission is limited to a very short distance. Water and certain ingesta introduce choleraic poison into the organism and it penetrates chiefly by the respiratory and alimentary passages.
10. The chief receptacles of the infectious principle are the dejecta in cholera, and the scales in small pox, whence it may be set free under favoring circumstances even after long intervals.
11. It is popularly believed that places where a plant called nemalligutta grows will be free from cholera; and it is believed also that *Bollawaram*, in the Kurnul District, is free from cholera, because of a tree with a white flower, the smell of which reaches to a distance of a thousand feet, grows there.
12. The following are supposed to tend to cholera; new grain, musty grain, fruit during the hot season, cucumbers, over ripe fruit, scarcity of food, and water charged with animal or vegetable impurities.

13. Practical measures calculated to restore an infected locality are :—Prevention of overcrowding in inhabited buildings, broad roads, open spaces of ground, abolition of cess-pits, removal of all refuse sweepings, animal and vegetable, the rapid removal of sewage, from habitations and streets, protection of all water from impurity, by the removal of sewage, drains, cart-stands, and burial grounds from the vicinity of wells and tanks, lime washing and disinfecting of houses, levelling pits and excavations, pulling down ruined walls, removal of all cattle from human habitations, disinfection or destruction of infected clothing, provision of means for personal ablutions, the examination of all articles of food ; the general distribution of simple instructions for the treatment of premonitory symptoms, the gratuitous supply of medicines, the fumigation of houses and streets by sulphur, creosote, tar, camphor, or other known and easily procurable purifiers.

14. When cholera rages in any particular division or quarter of a town, the inhabitants should be induced to move out into as many separate encampments as can be properly provided with medical aid. The selection of such encamping ground should be on elevated and dry situations sufficiently removed from the village or town and from swamps or pools of stagnant water. The banks of rivers are to be avoided, and ground where cholera has shown itself at some preceding time. The thorough washing of all the cloths, and the complete purification of all household goods removed into camp should be insisted on. Wells long in disuse should not be resorted to on such occasions.

RULES FOR ARRANGEMENTS TO BE MADE IN THE MANAGEMENT AND CONSERVANCY OF FAIRS AND FESTIVALS.

I. Accommodation.

1. Select and lay out suitable encamping ground in reference to prevailing winds on elevated, dry, clean and untainted soil, in proximity to the place of concourse and a pure supply of water.
2. Divide the ground into divisions and sections, separated with principal and subsidiary streets from 40 to 20 feet wide.
3. Put up temporary sheds and huts according to castes.
4. Leave space to the leward of each section for carts and cattle.

II. Conservancy.

1. Erect temporary latrines on the leward of each division, sufficient to meet the requirements of the encampment.
2. Remove daily all rubbish, dung and refuse, from both the village or town, and camp.
3. Remove all excreta from residences twice a day, and shovel in earth over the latrine trenches.
4. Burn all rubbish and bury all filth.

III. Water Supply.

1. Select suitable but distinct tanks, wells, reservoirs, or other sources of water supply—
 - (a) for drinking and domestic purposes only.
 - (b) for bathing ; and
 - (c) for watering cattle.
2. Place a Police guard over the source of supply selected for drinking, to guard it from contamination.
3. Establish water-pendals.

IV. Medical Supervision.

1. A medical subordinate should be deputed to superintend sanitary arrangements, distribute medicines, note the health of the assemblage, register all deaths, and take charge of the temporary hospital.

2. Depute agent to examine at the barriers all travellers, and to distribute cholera pills for immediate use if necessary, and to remove into special sheds all persons attacked by cholera.

V. Precautions against Accidents.

1. Assign gates for ingress and egress into each town, temple or shrine, in cases in which the numbers are considerable, and erect barriers to prevent an undue influx of devotees into limited areas.

2. Provide against fires.

VI. Police (Sanitary).

1. Bring to notice of medical subordinate all cases of sickness and death.

2. Give notice to the people of hospitals and depôts for issue of medicines.

3. Warn the pilgrims to apply for medicines on premonitory symptoms of disease.

VII. Construction of Latrines.

1. Latrines to consist of enclosures, in which parallel trenches should be dug 2 feet wide by 3 feet deep. The soil removed to be stored at their edges, and a portion twice a day shovelled in to cover the night soil.

2. At the termination of the feast these trenches should be fully covered in.

VIII. General.

1. Prior to feasts, fairs, &c., chuttrums, choultries, and grounds, generally resorted to by pilgrims, &c., as camping or halting grounds, to be put by District authorities into a good sanitary condition, and all the sources of water supply cleaned and purified; the same to be maintained in a good sanitary state till after the dispersion of the visitors and pilgrims.

2. Notices to the effect that hospitals and depôts for the free issue of medicines have been established, and that the people are to resort to them on the first occurrence of illness, should be posted in the Vernacular all over the camp and town, and the Police instructed to distribute them as well.

3. Notices of the arrangements made for the general convenience of the people should be posted at the camp, as well at the chuttrums and camping grounds of the last stage leading to the camp.

4. At the termination of the feast, festivals or fair, should cholera have prevailed amongst the people, halting grounds are to be ploughed up and, if possible, sown with some green crop and the chuttrums and choultries fumigated and lime washed.

1st April 1884.
